Summary

I am a dynamic Full Stack Developer with hands-on experience in building scalable web applications at Mfilterit. My expertise lies in using Next.js, TypeScript, and Node.js to create responsive user interfaces and integrate REST APIs. I'm passionate about producing clean, maintainable code and thrive in collaborative Agile environments.

Gmail · GitHub · Next.js · TypeScript · Node.js · REST · React · Agile · JavaScript · Tailwind · HTML · CSS · Figma · Express.js · MongoDB · Mongoose · Git · SQL · Clean Code · Modular · Python · C/C++ · DSA · React Query

Experience

Mfilterit

Bengaluru, Karnataka

Software Intern

09/2025 - Present

A company specializing in data intelligence and monitoring solutions

- Developed a social media monitoring application using Next.js, TypeScript, React Query, and ShadCN UI
- Integrated RESTful APIs with React Query for efficient data fetching, caching, and synchronization
- Designed responsive UI components ensuring accessibility and consistency

Appsi Studio

Patna, Bihar

Frontend Developer Intern

03/2025 - 08/2025

A digital agency focused on web and mobile applications

- Built responsive UIs with React.js, Tailwind CSS, and Figma
- Created onboarding flows, animated sliders, and mobile landing pages
- Contributed to a no-code website builder enabling effortless website creation

Education

Sagar Institute of Science and Technology

08/2023 - 05/2027

B.Tech in Computer Science and Engineering

Projects

StudyBuddy

AI-Driven Learning & Task Management Platform

- Built a study assistant where users can host quizzes, schedule tasks, and track learning progress using Next.js, TypeScript, and MongoDB
- Built an AI-powered study assistant enabling users to host or join quiz rooms, schedule learning tasks, and receive personalized study recommendations.
- Integrated chat-based AI assistance to generate, plan, and track study goals dynamically.
- Implemented real-time collaboration and task scheduling features with a scalable backend using Node.js and MongoDB.

FixFrame AI

Intelligent Wireframe Builder for Dashboards

- Developed an AI-assisted wireframe builder suggesting dashboard layouts and components with collaborative workspace sharing.
- Developed an AI-driven wireframe builder that suggests dashboard layouts and design components for developers and designers.
- Enabled real-time workspace sharing for collaborative UI/UX creation and feedback.
- Designed a modular architecture integrating FixFrame AI for automated layout recommendations and design optimization.

HugWithBurger

Interactive Food Ordering Website

- Built a responsive food ordering website featuring burgers, beverages, and meal combos with transparent ingredient details.
- Added interactive UI components and dynamic recipe previews for better customer engagement.
- Focused on clean, user-friendly design and optimized client-side performance for fast browsing.
